BUSINESS DEPARTMENT

Terms of Payment

CASH ACCOUNTS

(Saves you money) Cash with order before shipment, deduct 5% for cash.

CHARGE ACCOUNTS

New accounts gladly opened upon receipt of satisfactory bank or Trade references, (allowing time for investigation). Our net terms are strictly thirty days from the first of the month following date of invoice, (past due accounts subject to 8% interest).

FREIGHT OR EXPRESS C. O. D.

Unless customers have established a credit with us we require one-third of the amount of order before making shipment, the balance may be payable at destination.

PACKING CHARGES

Packing is figured at cost for less than carloads. In carload lots we make no charge for packing.

RESERVE ORDERS

Stock booked or marked by the customer in the nursery will be priced according to its value. This will include specimen stock not priced in this catalog. Deposits are to be made on this stock to assure us that it will be taken off the market.

ALL ORDERS ARE ACCEPTED SUBJECT TO PRIOR SALE

With the understanding that same shall be void should injury befall the stock from flood, drought, frost, or any other cause beyond our control.

COMPLAINTS

No claim will be entertained as to shortage in count, undergrade, damaged stock in any way, if not reported to us within three days upon receipt of goods. We make it a point to give all reasonable claims proper and just consideration, but it is not fair to wait an indefinite period to notify us of any complaints in reference to the stock.

GUARANTEE

We exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name. Griffing Nurseries shall be liable only for the stock which does prove untrue, and shall not be liable for any greater amount.

OUR LIABILITY

We exercise all possible care to have nursery stock well-rooted, well-grown, healthy, true to name, properly packed and shipped according to instructions. It is, however, mutually agreed between the purchaser and ourselves that our liability under the foregoing is limited to the amount of the original price received. No guarantee, expressed or implied, that trees will live or grow.

Prices

PRICES in this, our 1931 Wholesale Catalog—grade for grade—are lower,—MUCH LOWER—than at any time in the past.

OLD PRICES CANCELED

THIS CATALOG CANCELS ALL PREVIOUS PRICES and contains only a partial list of the many varieties which we have for sale.

HELP PROTECT PRICES:

This Catalog is intended for the **TRADE ONLY**, if it reaches people NOT entitled to Trade Prices, we will thank any Nurseryman or Florist to advise us, so that our mailing list may be corrected.

Transportation

FREE PACKING IN CARLOADS

As we give the earth, it's heavy for Express or Freight shipments, and the rates are higher, we recommend carload shipment whenever possible.

OUR FREIGHT SERVICE

From the net work of Railroads and Truck Lines entering Beaumont, very quick delivery is assured. All goods travel at purchaser's cost and at Carrier's risk.

Prices in this catalog are based F. O. B. at nursery. Approximate delivery cost given upon request. Carload shipments loaded and shipped at our Private Siding, "MT EVERGREEN, TEXAS."

CARRIER'S LIABILITY

Before accepting any shipment from the Carrier, customers should examine the shipment and if not in good condition, have the Handling Agent note on the Freight Receipt "a bad order exception," then we will be glad to assist our customers in getting refunds on overcharge or damaged material in transit.

Goods are sold F. O. B. our shipping point, and when we receive a Bill of Lading from the Carriers our responsibility ceases. Many Nurseries and Dealers buy our nursery stock, but do this on their own responsibility, and we waive any liability for promises, or statements made by them.

B&B EVERGREENS—CARLOAD LOTS

OUR SPECIALTY

With an (18) eighteen car side track located on our grounds, we are able to load and ship out carloads of **fresh dug trees** on very short notice, weather permitting. Oftentimes we can dig and ship out the same day. By the fast freight service the carloads go right through in a few days time, and the stock is ever fresh and nice green colored.

NO AGENTS

We employ no agents and no dealers are authorized to use our name. We are not responsible in any way for stock repacked or resold.

APPROXIMATE WEIGHT OF BALLS

As to the weight on the balls, some customers desire them small to save freight, while others want heavy balls for the safety of transplanting. From years of experience, the size of the balls depend on the natural root system, the size, variety and class of nursery stock, and the season of the year in which the shipment is made and the length of the time involved in transit.

QUANTITY PER CAR

We are often asked how many balled trees will go in a car. It does not require many balls to make a 16,000 pound minimum car. An average runs about as follows:

Large grades100 to 150 balls per minimum car

Medium grades....150 to 200 balls per minimum car

Small grades200 to 350 balls per minimum car

On the mileage basis for freight on one hundred miles the average cost would be \$42.00; two hundred miles, \$56.00, and 300 miles, \$68.00. Same rate, per 100 lbs. for excess weight.

A Nursery with a Background

From 1886-1931 of GROWING FINER PLANTS FOR THE SOUTH!

SERVICE

In this day and time, SERVICE is what people are looking for, and it is why we are in the Nursery Business—to give the best service, the best trees, and the best value for the money.

Always, it is our aim and policy to follow the Golden Rule, "Do unto others as you would have them do unto you." In the thousands of small and large orders shipped each season, they all receive the Personal Attention from our score of Experience Nursery and Office force.

Many of them have worked practically all their lives on the nursery. We have in our employ over thirty people who have been with us from ten to thirty years—this is a guarantee to you that you will get the proper service.

WHY OUR SERVICE IS BEST

In our immense concern it is possible for men to specialize and find the position for which they are best suited by nature and training, and there they are much better equipped to serve, than in a smaller business where varied duties must fall to each.

WHY OUR PRICES ARE LOW

With so many friends it is our financial interest to maintain our record of nearly fifty years and realizing this, we are constantly alert to guard against errors and dissatisfaction from any source. If you multiply our volume of business by the years we have been in operation you can see the tremendous experience back of us. You gain by sending your orders to the largest concern, for we can afford less profit, giving you the difference in lower prices and better plants.

LOW GROWING COST

Do not waste your time growing inferior stock. Buy from us. We can produce it much quicker, better and cheaper than you, as we specialize in quantity production and know how, with our 45 years of nursery experience in the south.

INQUIRIES

Concerning shipments, rates, weights, sizes, etc., will be promptly and gladly answered. If you have used our material you know the value of our "B&B" stock. A trial order will fully convince you. Once a customer, always a customer is our Motto.

LANDSCAPE SERVICE

We will be glad to submit, at cost, Landscape Plans that will help you sell your ideas. Our plans are drawn by Landscape College men who have had years of experience in Southern conditions and are well acquainted with varieties best adapted to your section. Write us for particulars.

IRRIGATION

Located along the largest rice canal in America (capacity 300,000,000 gallons per day) which not only supplies the city of Port Arthur, and their extensive Oil Refineries as well as 30,000 acres of rice land with fresh water from the Neches river, the year round. We make full use of our opportunity to keep our stock in healthy condition even during the driest seasons.

The Age of Standardization

There are standards to go by and we are religiously endeavoring to follow them, even though we lose orders on account of buyers judging price by height alone.

In every nursery row there are several grades or quality of plants (about same heights the ordinary way of grading).

Standardized Grading by X's

We wish to explain Grading by Quality as adopted by the American Association of Nurserymen's in Chicago in 1923, which reads as follows: "Grading by quality is determined largely by height, spread and general appearance of the individual plant designated by the Ass'n. X signifies good, plantable quality. XX indicates heavy grade. XXX indicates Extra Heavy (Perfect specimens).

X—WE HAVE THE PRICES! (25% Discount)

For X quality stock, which some customers may be able to use (but not recommended by us) deduct 25% from the XX prices listed in this catalog.

XX—WE HAVE THE VALUES! (As Listed)

In this catalog we list Heavy XX Quality nursery stock. This XX Quality is far better, and more uniformly graded than ordinarily sent out by nurseries who do not follow standardized gradings.

XXX—WE HAVE THE QUALITY! (25% Extra)

Many customers prefer XXX—extra heavy perfect specimens recommended by us, for which we offer at a charge of 25% above catalog prices.

Pay Half to Come

We will CREDIT YOUR RAILROAD FARE one way on carload purchases, or its equivalent where you drive, (over the good highways leading into our city from all directions.)

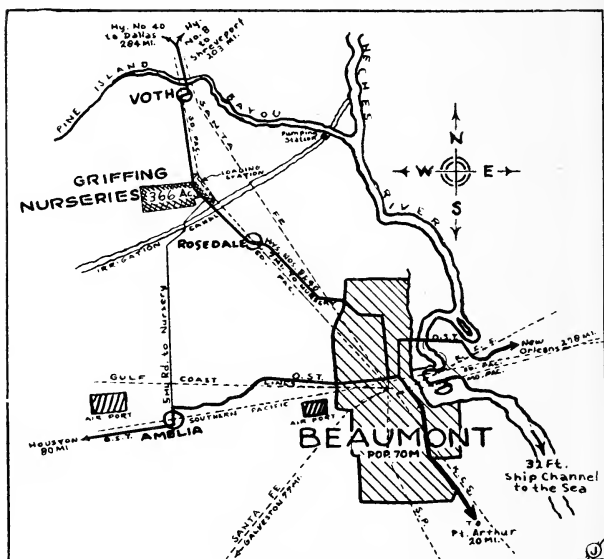

Beaumont is favorably located; overnight sleepers from many cities give a day at the Nursery which you will never forget, besides we can TALK TREES, give special bargains, etc.

Visit Us

WE WELCOME YOU TO OUR NURSERIES!

From Beaumont north over Highways No. 8 and No. 40, you drive through fragrant winding woods to Mt. Evergreen where we have three hundred and sixty-five acres of the choicest Balling Soil in the world, selected by our effecient staff from long and expensive experiences. A warm welcome awaits you, with TRUE SOUTHERN HOSPITALITY, come and bring your family. We assure you a good time, besides you will be able to gather lots of valuable data for your Landscape Customers, and many new ideas which you will carry home to them, which of course means \$ \$ \$ to you.

LOCATION

If you arrive in Beaumont unannounced, telephone us and we will call for you; or take the Rosedale Bus, coming direct to our office, every hour on the hour at the corner of Crockett and Main streets.

Standard Plant Names

We take great care to catalog all varieties of stock we grow by their Common names, Scientific names, and their Synonyms, and distinguish them in this catalog as follows:

- (1.) Common names are listed in Small Capital letters.
- (2.) Scientific names are listed in Small Bold Face letters just opposite the Common names.
- (3.) Synonyms are listed by inserting them in parenthesis.
- (4.) New names listed as New Horticultural Varieties (New Hor. Var.) are new plants which the Standardized Committee recommend the use of the common name alone.

"BALLED AND BURLAPPED"—"B&B"

"B&B" indicates where the Nursery Stock is taken up with the original earth in which it grew, by carefully chiseling away the soil without cracking or crumbling the dirt, which is to remain; then this ball is securely inclosed with strong burlap and pinned with special needle-pointed nails, taking up all the slack in the burlap.

"NOT BALLED"—"N-B"

Means when plants are dug with NAKED ROOTS AND PUDDLED IN THICK MUD. For "N-B" shipments, we exercise every precaution to see that the stock reaches our customers in good condition.

CONIFEROUS EVERGREENS

DEPARTMENT

CONIFEROUS EVERGREENS are the tall cone-bearing evergreen trees. They include many varieties, among which are the Arborvitaes, Cypressess, Junipers, Pines, etc.

They keep their beauty the year around.

The conifers should always be handled "B&B." And when handled Balled the Griffing way, grow off with universally pleasing results.

Grown from grafts or cuttings, which will make them true to name and type unless otherwise stated.

Arborvitae

Thuja Orientalis

(Biota)

There are two types of Arborvitae, known as Occidental and Oriental. The Occidentals are generally not suited for Southern states, while the Oriental or Chinese types all do well in the South. The Oriental type is also classed as (Biota) which is now unapproved.

Many people prefer Arborvitaes on account of their formal, symmetrical shapes and as they are such widely varying types, even as to shape and color, they make groupings for various locations so that they are indispensable as there is some kind suitable for every landscape use.

BROADLEAF EVERGREENS ***and FLOWERING SHRUBS*** **DEPARTMENT**

Unlike other plants and flowers which are pretty only during certain seasons of the year and have to be replaced annually, these Broadleaf Evergreens look attractive at all times.

Broadleaf Evergreens have received our close attention for years and many highly desirable older types have been brought to the front and many others introduced by our efforts.

Brilliant flowering shrubs. Even though bareness in winter months fails to discredit their beautiful fresh spring foliage and the gorgeous many-colored blossoms. Varieties may be selected to give wealths of bright-colored flowers from very early spring until frost.

Do not prune when dormant, as this frequently spoils their chance for blooming.

Privet

Ligustrum

The word "Ligustrum," refers to the entire family of Privets, which is by far the largest and best group of Broadleaf Evergreen. Varieties differ widely in size, shape, habit of growth, and color.

We have selected from thousands of seedling lucidums several varieties of which we have given descriptive names.

Our Glossy Privet (Lucidum) will make choice plantings by themselves, both for shape and color of foliage. The landscape artist only needs to be familiar with this valuable group to carry out his planting ideas for year round effects. Many of these varieties are harder farther North than they are usually supposed to be.

Fragrant white flowers are borne in spring and black fruit follows, remaining on the plants during winter, in medium and large clusters like wild grapes.

Standardized Grading

In grading Evergreens by Quality, we have endeavored to follow the system adopted by the American Nurserymen's Association in 1923, reading as follows: "GRADING by quality is determined largely by height, spread and the general appearance of the individual plant designated by the American Association. X signifies good, plantable quality; XX indicates heavy grade; XXX indicates extra heavy perfect Specimens."
